Pro-Watch® 4.0 Security Management

Selected by top resellers in 2011 as a Best Channel Product by Business Solutions Magazine, Pro-Watch® protects people, secures assets and ensures regulatory compliance by combining visitor management, access control, digital video, intrusion and other functions into one powerful system. Now Pro-Watch 4.0 is the next big thing in creating smart buildings.

Pro-Watch® 4.0

Designed with an open platform that offers integration, scale and flexibility, Pro-Watch 4.0 provides these new features:

Support for Wireless Readers by IR Schlage

Provides flexibility for installations that were traditionally difficult to run wires to in the past.

- Offers the benefits of a hard-wired system without the wires
- Secure more entry ways for increased security
- Save on cost for wiring and installation

Web Based Alarm and Event Monitoring

Easily monitor alarm and events anywhere with an Internet connection.

- Respond quickly and with accuracy to alarms and events
- Reduce PC operating system issues—no dedicated PC costs
- Ensure that information vital to business success is never overlooked

Enhanced Graphical User Interface (GUI) and Reporting

- Point and click through a more user-friendly and modern interface
- Create, customize and save reports with Pro-Watch Compliance Report Manager—now a standard offering with Pro-Watch 4.0

MAXPRO® VMS R300 Now Available with Pro-Watch 4.0

Pro-Watch® Integration Kit

The Pro-Watch® Integration Kit, powered by the NiagaraAX Framework®, uses open architecture to integrate third-party products for increased productivity and enhanced monitoring of security, fire/life safety and energy management.

- Drives energy savings through a more efficient use of HVAC and building management systems, enabling real return on investment
- Create custom-fit solutions using easy to use tools from the Pro-Watch Integration Kit—saving time and money
- Seamlessly integrate visitor management, mass notification and other systems for tighter security and management of multiple systems from a single interface

Pro-Watch® + Vindicator® Standard Edition (SE)

COMING SOON

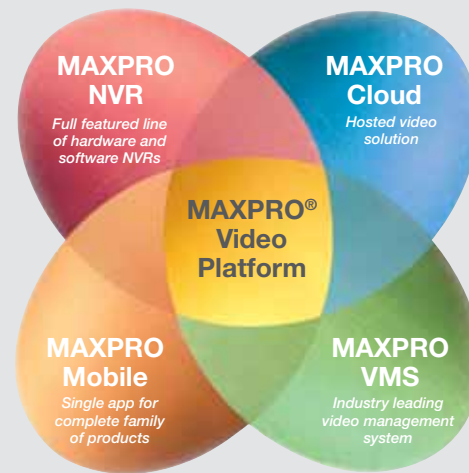

Critical infrastructure sites around the world will soon be able to rely on an integrated Pro-Watch and Vindicator intrusion detection solution for complete security management and situational awareness. Operators can use a single workstation to manage map-based security event information gathered from interior and perimeter intrusion, video detection, access control and fire systems. The integrated Pro-Watch + Vindicator solution offers:

- Single interface to monitor access control and alarm events
- Layered security offers advanced notification of threats
- Seamless integration to third party systems
- Guarantees increased system uptime using instant notification
- Scalable from enterprise to critical infrastructure applications

MAXPRO® IP Solutions

Honeywell's expanded MAXPRO® family of scalable IP video surveillance solutions includes a video management system, a full line of network video recorders, cloud-based services and mobile apps. It's the first complete portfolio of IP video management hardware and software that's easy to use and scalable for small and large applications. The MAXPRO platform is fully open, incorporating PSIA and ONVIF standards, native integration for third-party cameras and encoders, and RTSP (real time streaming protocol).

MAXPRO® VMS

MAXPRO® VMS integrates video cameras, alarm systems and access control to quickly and accurately detect threats and areas of risk.

- Offers one command and control interface that brings together analog, digital and network video devices
- Maximizes the value of Honeywell's complete security offering with integration to Pro-Watch® security management, intrusion systems, and recording devices
- Open architecture affords ultimate flexibility to let third party providers and security/IT manufacturers integrate with the MAXPRO VMS platform

MAXPRO® NVRs

The MAXPRO NVR family is ideal for entry to enterprise IP video surveillance systems, and it's based on the MAXPRO VMS user interface for a feature-rich and user-friendly experience that enables users to *"Learn One, Know Them All."*

Boxed NVRs: XE, SE, PE

- XE (Xpress Edition):
Entry level, 8/16 channel support
- SE (Standard Edition):
Mid-tier, 32 channel support
- PE (Professional Edition):
Enterprise, 32 channel support
—64 Coming Soon

Software only NVRs

- Base software/license: 4, 8, 16 or 32 channel support
- Upgrade licenses to add 1, 4, 8 or 16 channels

MAXPRO® Cloud

Honeywell's new MAXPRO® Cloud hosted video service lets users manage video using any PC, Mac, smartphone or tablet connected to the Internet.

- Future-proof design ensures automatic system updates
- Minimal investment and complexity
- Reduces installation and service time and costs
- Ensures continued productivity and the peace of mind in knowing video is always available—*Anytime, Anywhere*

Award-winning solution:
2012 SIA Best in
Commercial & Monitoring
2012 ESX Maximum
Impact Awards

MAXPRO® Viewer

MAXPRO® Viewer, the latest addition to our MAXPRO family, is a freeware software application that allows multi-site viewing of Honeywell recorders including MAXPRO NVR, Rapid Eye™, Fusion, HRDP and HRXD Series.

- Allows recorders to be grouped and viewed simultaneously through salvos and on multiple monitors
- Creates a single command point where video and events can be viewed from a single user interface

IP Cameras

Honeywell's equip® Series of IP cameras offers a solution for every application—whether VGA, HD (720p and 1080p), Wide Dynamic and H.264. Our IP cameras provide superior image quality without sacrificing bandwidth. And the Honeywell Open Technology Alliance (HOTA) enables open exchange of technology between security and IT manufacturers.

www.honeywell.com/security/HOTA

MAXPRO® Mobile

The MAXPRO® Mobile app allows users to connect to a MAXPRO NVR as well as other Honeywell's NVR and DVR recording devices from a remote location. Operators can use the app to perform common daily tasks.

Features include:

- Live video viewing
- Zooming in for full screen viewing
- Playback or searching for video by date and time
- Taking a snapshot of a video frame
- Touch, drag and drop cameras

Security on the Go!

COMMERCIAL SECURITY INTEGRATION

Performance Series

Honeywell's enhanced Performance Series includes a full array of indoor and outdoor cameras from basic functionality to IR illumination allowing customers to pick the right application for their needs. Our Performance Series PLUS cameras feature dual voltage capabilities for installation flexibility. Our digital video recorders support a wide variety of user-friendly capabilities such as mouse operation, IR remote control, mobile apps and multi-site remote access software.

All of the new Performance Series products are backed by Honeywell's three-year warranty and the new 365 Swap for easy, no-hassle returns and exchanges at the ADI counter.

- Indoor, Outdoor IR Bullet Cameras
- Indoor, Outdoor IR Ball Cameras
- Indoor, Outdoor Mini-Domes with or without IR
- Dual Voltage Cameras
- 4, 18 or 16 Channel DVRs

The performance you want at the price you need.

NetAXS-123 with Video

Adding video to an access control system doesn't have to be difficult or expensive. NetAXS-123 with Video offers a simple and affordable way to add event-based video recording to web-based access control, without having to invest in a DVR or NVR.

- NetAXS-123 is simple, scalable and flexible. And now with video it's even better.
- No NVR or DVR required
- Records video when events occur—reduces need for extensive storage
- Retrieve and export stored video
- View live video and record from up to 3 cameras

WIN-PAK® 3.0

WIN-PAK 3.0 combines all the power of access control, digital video, and intrusion in a single user interface. It's available in three editions: Express (XE), Standard (SE) and Professional (PE).

- All-in-one security integration helps users spend less time managing their system and more time focusing on their business
- Increased access control support including NetAXS-123 and NetAXS-4 gives users full control and increased functionality
- Video integration with MAXPRO NVR XE/SE/PE provides users with add-on video support for current systems
- Redesigned video interface screen increases security response time by making it easier for users to view live video

COMMERCIAL SECURITY INTEGRATION

Tuxedo Touch™

Honeywell's Tuxedo Touch functions as a building controller, security system keypad, digital picture frame and video viewer all in one.

- Prompts and graphics are easy to read and easy to see on the large, 7" high-resolution touchscreen—reducing employee training time
- Intuitive interface simplifies automation and control of a facility's security system and Z-Wave® enabled thermostats, door locks, shades and lighting
- Thermostats can automatically adjust and lights can be programmed to turn on and off based on the specific needs of a business—increasing savings and conserving energy
- Built-in web server enables system control via Wi-Fi-enabled smartphones, tablets, PCs and Internet TVs
- Users can view live video of up to four cameras per screen around the premises on the touchscreen, smartphones, tablets or televisions
- Touchscreen functions as a dynamic communications tool—letting business owners showcase products in vivid detail, advertise sales and special promotions, post employee announcements and more

Honeywell Total Connect™ Remote Services

Total Connect makes it easy for people to stay connected and in control of their businesses on the same mobile devices they use each and every day. Wherever they are, they can:

- Control their security systems remotely and receive e-mail alerts and event-driven video notifications in real time
- View up to 100 sites with one login—great for businesses with multiple locations
- Control lights, thermostats and locks and even set scenes and schedules for energy savings and convenience when used with Honeywell's LYNX Touch 5100
- Observe employee performance, productivity and behavior via live, look-in video
- Protect inventory, avoid disruption of business and create a safer working environment by being alerted to floods and leaks
- Prevent food spoilage and protect inventory by knowing when extreme hot or cold temperatures have been detected

SC100 Series Seismic Vibration Sensors

Honeywell's SC100 Series Seismic Vibration Sensors are designed for the protection of high-value assets in financial, retail and other applications.

- SC100 detects heat and vibrations resulting from attempts to disturb solid structures including fixed ATMs, banks, vaults, safes and doors
- SC105 safeguards freestanding objects like mini ATMs, gun cases, vending and ticket machines or to secure file cabinets in noisy environments
- Reduces the potential for false alarms while detecting heavy strokes from sledgehammers, repeated knocks from hammer and chisel attacks, drilling, mechanical cutting, acetylene torches, diamond drills, hydraulic jacks and more

VISTA® Security Systems

Deployed in millions of facilities globally, Honeywell's commercial-grade VISTA® security systems provide robust solutions that help protect businesses from break-ins, unauthorized entry and internal theft.

- Seamless integration of intrusion, video and access control
- An ideal fit for any size commercial enterprise
- Supports up to six graphic touchscreen keypads per installation
- Compatible with Honeywell Total Connect™ Remote Services—providing security system control on the go, critical e-mail notifications and the ability to view live, look-in video
- Enhanced performance for WIN-PAK® and connected building applications

5816OD Wireless Outdoor Motion Sensor

Honeywell's all-weather 5816OD Wireless Outdoor Contacts keep business owners aware of what's going on around the exterior of their facility—delivering robust, economical protection in even the harshest environments.

- Ideal for gates, sheds, fences, barns, detached garages or any other surfaces in commercial environments
- Can protect outdoor equipment and merchandise when used with outdoor rated magnetic pull-apart contacts
- Weather-resistant IP65 rated housing
- Temperature range from – 40° F to 122° F
- Compatible with Honeywell Total Connect Remote Services, which notifies users via e-mail or text messages when motion has been sensed in the protected area
- Compatible with all Honeywell VISTA® control panels
- Can be custom-painted to match its surface. Krylon® "Fusion for Plastic", Rust-Oleum® "Plastic" and Dupli-Color® "Vinyl & Fabric Coating" are the recommended paints.
